DUE

## NR503\_WEEK 6 CHRONIC HEALTH\_SEPT19

CRITERIA	RATINGS					
Assignment Content Possible Points = 185 Points view longer description	15 pts Excellent  Comprehensively and succinctly states the problem/concern. Clear presentation of the problem as well as the significance with a scholarly overview of the paper's content.	14 pts V. Good Identifies the problem/concern with adequate but not in-depth presentation.	12 pts Satisfactory Identification of problem/concern is limited.	8 pts Needs Improvement Improvement- Identificatio of problem/concern is unclear.		
Background/Significance	30 pts Excellent  Background and significance is complete, presents risks, disease impact and includes a review of incidence and prevalence of the disease within the student's state compared to national data. Evidence supports background. A student created table is included.	27 pts V. Good Background is complete, presents risk, disease impact and at least one set of incidence and prevalence statistics supported by evidence, for instance state data or national data is presented, but not both. Or, full data is presented but student table is not included.	26 pts Satisfactory Background missing one or more key points and at least one set of incidence and prevalence statistics are presented. Lack of evidence or limited presentation of the background. A table is included which may or may not be student created; may be limited in data.	15 pts Needs Improvement Background missing more than one key point and at least one set of incidence and prevalence statistics are presented, or there is no supported evidence. Unclear conclusions or presentation. No student created table is included; or if included is limited in scope or is not student created.		
Surveillance and Reporting	30 pts Excellent  Current state and national disease surveillance methods are reviewed along with currently gathered types of statistics and information on whether the disease is mandated for reporting. All writing is supported by evidence.	27 pts V. Good State and national disease surveillance methods are reviewed, currently gathered types of statistics is scant, reporting requirements discussed. All writing is supported by evidence.	26 pts Satisfactory State or national surveillance statistics are discussed as an overview, lacking detail / depth. Mandated reporting may be absent. Writing is supported by evidence but may be inconsistent.	15 pts Needs Improvement One of either state or national disease surveillance methods reviewed; currently gathered types of statistics may be missing or information on whether the disease is mandated for reporting is missing. There is a lack of depth with inconsistent use of evidence.		
Descriptive Epidemiology	35 pts Excellent  Comprehensive review and analysis of descriptive epidemiological points for the chronic health problem. The 5 W's of epidemiological analysis should be fully identified. Supported by scholarly evidence.	32 pts V. Good  Review and analysis has depth in general but may be missing one of the 5 W's OR may be scant in one area of the 5 W's. All writing is supported by evidence.	29 pts Satisfactory Review and analysis superficial in all of the 5 W's OR may be scant or missing 2 or more of the W's. Evidence is present but may not be throughout all content areas.	18 pts Needs Improvement Review and analysis is missing depth throughout all of the content areas. Evidence may or may not support the writing.		

## NR503\_WEEK 6 CHRONIC HEALTH\_SEPT19

CRITERIA	RATINGS					
	30 pts Excellent	27 pts V. Good	26 pts Satisfactory	15 pts Needs Improvement		
Screening, Diagnosis, Guidelines	Comprehensive review of current guidelines for screening and diagnosis. Screening tool statistics related to validity, predictive value, and reliability of screening tests are presented.	Adequate review of guidelines for screening, diagnosis, and statistics related to validity, predictive value, and reliability of screening tests is presented.	Limited review of guidelines for screening, diagnosis, and statistics related to validity, predictive value, and reliability of screening tests.	Minimal or unclear review of guidelines for screening diagnosis, and statistics related to validity, predictive value, and reliability of screening tests. There is a lack of depth with inconsistent us of evidence.		
	30 pts Excellent	27 pts V. Good	26 pts Satisfactory	15 pts Needs Improvement		
) Plan	Integrating evidence, provide a plan of how a nurse practitioner will address this chronic health condition after graduation. Provide three specific interventions that are based on the evidence and include how you will measure outcomes (how will you know that the interventions have utility, are useful?) Note: Consider primary, secondary, and tertiary interventions as well as the integration of health policy advocacy efforts. All interventions should be based on evidence — connected to a resource such as a scholarly piece of research.	An adequate, but not fully comprehensive, plan of action specific to the problem, and the geographic area is presented with 3 evidenced based actions that will be taken to address the impact, outcomes, or prevalence of the disease.	A limited plan of action specific to the problem, and the geographic area, outcomes, or prevalence of the disease. Three actions or less may be presented with limited or little evidence.	Minimal or unclear review of guidelines for screening diagnosis, and statistics related to validity, predictive value, and reliability of screening tests. Actions are minimal or unclear, or lack specificity, are not supported directly by evidence or are not direct actions the student can take in practice. There is a lack of depth with inconsistent use of evidence.		
	15 pts Excellent	14 pts V. Good	12 pts Satisfactory	8 pts Needs Improvement		
Summary/Conclusion = 185 Points	The conclusion thoroughly, clearly, succinctly, and logically presents major points of the paper with clear direction for action. Includes scholarly references.	The conclusion adequately and logically presents major points of the paper with clear direction for action, but lacks one major point or is not succinct. Includes scholarly references.	The conclusion is a limited review of key points of the paper, is not succinct, or lacks one or more major points of the paper or clear direction for action.  Scholarly references may or may not be included.	Conclusion is unclear or significantly limited in overview of the paper. Scholarly references may or may not be included.		
Assignment Format Possible Points =15 Points	10 pts Excellent APA is consistently utilized	9 pts V. Good One or two errors in APA	8 pts Satisfactory Three-Five errors in APA	5 pts Needs Improvement Six errors in APA format		
view longer description	according to the 6th edition throughout the paper.	format	format
